# Flat and vertical button attach machine

JK-T1377GK

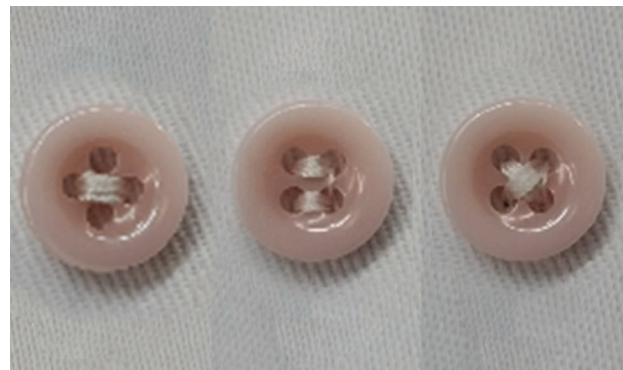

# JK-T1377GK

Item: Flat and vertical button attach machine  
 Features: 2-in-1 button sewing machine, easy to use and change

## 1 2-in-1 button sewing machine, easy to use and change

2-in-1 button sewing machine, easy to use and change: Upper and lower lifting hooks and button clamp holders are used in common, and the switching between flat and shank button devices can be realized within 15 minutes quickly.

## 2 Stepper presser foot lifter, light sound and long service life

Closed-loop motor control: more convenient to adjust, more precise control, lighter lifting sound (3.5dB less), faster reflective efficiency, more durable than solenoid.

## 3 Free to switch between 3 patterns

One key to switch between pattern and number of stitches, long press the number of stitches key to set sewing stitches; adding the counting function to facilitate the calculation of production and wages through the parameter settings
